

## Safety, Health & Environment Policy

**To create & maintain a world class facility with safe & healthy working condition to ensure total employee satisfaction with great place for work, River Engg shall strive to do this by:**

- Enhancing awareness, skills and competence of our employees and contractors through training to demonstrate their involvement for sound SHE performance.
- Protection of Environment, Preventing pollution and achieving continual improvement in the effectiveness and performance of Occupational Safety, health & Environment Management System by improving process work practices through objective driven targets.
- To Manufacture & supply products under safe and healthy work condition and Minimizing SHE Risks.
- To Strive towards Conservation of Natural Resources, reducing waste, Nos. of Incidents, and elimination of hazards.
- Prevention of injury & ill health and comply with applicable legal and other requirements to improve the effectiveness of the SHE management.
- To Build an environment where there is consciousness towards conserving all resources.
- Influencing our supply chain for the optimum use of resources and improvement in SHE performance and legal compliance.
- Consultation & Participation of workers.
- Communicate to our employees and make available to general public.
- Enhance Satisfaction of interested stake holders.
